

PARK PLACE

INSTALLED 2010

SIZE:
1,891,000 SQ FT

USE:
CLASS A COMMERCIAL
OFFICE SPACE

LOCATION:
IRVINE, CA

AUTOMATED DEMAND
RESPONSE CAPACITY:
1.4 MW

Park Place is a Southern California landmark. Its unique mixed use campus environment includes more than 1.8 million square feet of Class-A office space that is home to Western Digital, US Bank, Prudential, Samsung, State Farm and Hyundai Capital.

With the help of Southern California Edison incentives, LOBOS was installed and is now delivering 1.4 MW of automated demand response capacity.

NEW LEVELS OF HVAC INTELLIGENCE

LOBOS brings never before seen levels of intelligent, efficient operation to commercial comfort systems. Before LOBOS, the basic operation of large-scale commercial HVAC systems hadn't changed in decades. Even with more efficient motors, pumps & drives and the addition of digital controls, HVAC systems being installed in 2012 operate pretty much the same way they did in 1972. LOBOS changes that.
